

布基纳法索-KD-自卸车大件尺寸-5600*2300*1500

序号	总成	尺寸	数量/车
1	副车架总成+液 压缸下支座 =底架总成 重量约 590kg	 The technical drawing illustrates the sub-frame assembly from two perspectives. The top view shows a long, narrow structure with a total length of 5145 units. A specific section at the left end has a width of 398 units, and a mounting bracket at the right end has a width of 200 units. The side view shows the structure's height, with a total height of 1270 units and a central section height of 850 units. The right end features a complex mounting structure with a height of 1452 units. A hydraulic cylinder, shown in a cross-section view, is attached to the right side with a mounting bracket that is 374 units wide.	1

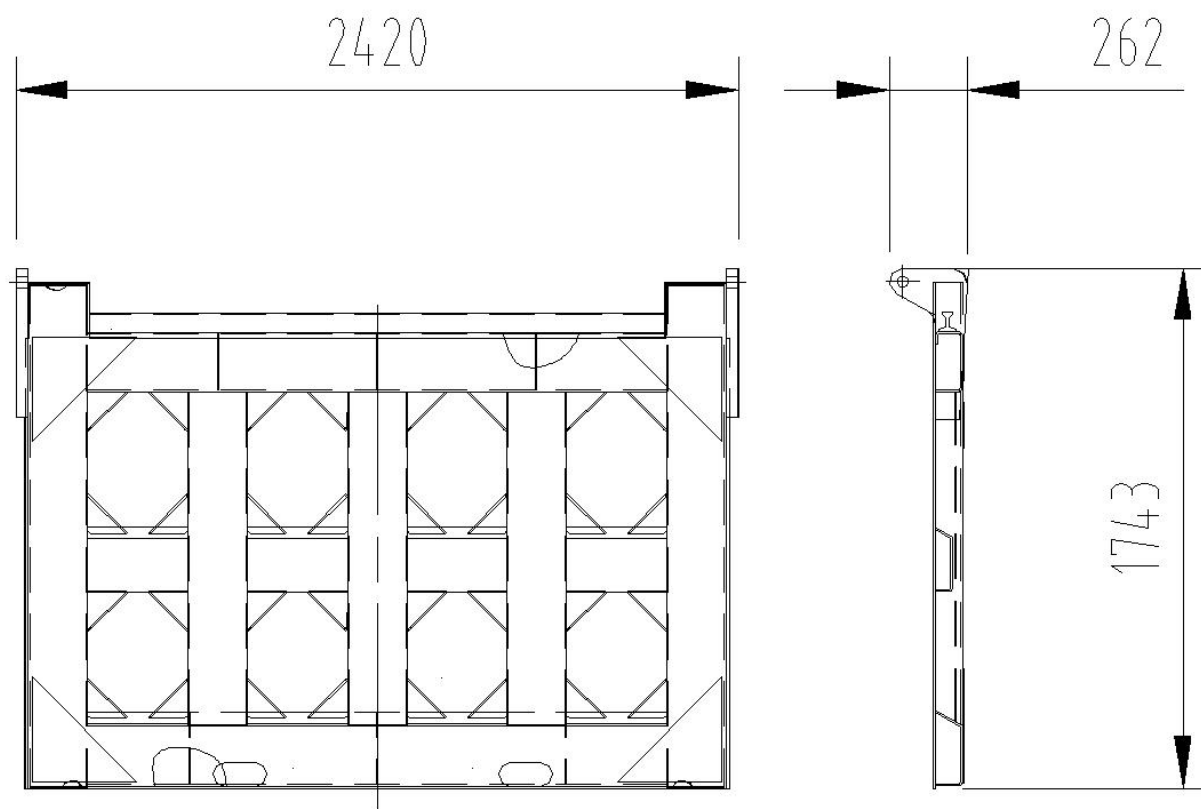

2	底板总成 重量约 1800kg	 The technical drawing illustrates the base plate assembly from multiple perspectives. The top view shows a rectangular grid of 10 columns and 6 rows, with a total width of 5616 and a total height of 2300. The side view on the left indicates a thickness of 112. The side view on the right shows a tapered profile with a height of 190. The drawing uses solid lines for the main structure and dashed lines for internal or hidden components.	1
